

Cosmetics Raw Material Skin Whitening CAS 501-30-4 Kojic Acid

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: KHD
- Model Number: 501-30-4
- Minimum Order Quantity: 1kg
- Price: Please consult customer service
- Packaging Details: 1kg/bag, 25kg/drum
- Delivery Time: 2-5 days
- Payment Terms: T/T, Western Union, Bitcoin
- Supply Ability: 10000kg/Day

Product Specification

- Appearance: Powder
- Product Color: White
- Brand Name: Kaihuida
- Highlight: White Methylamine Hydrochloride, Methylamine Hydrochloride Powder, methylamine hcl Powder

Product Description

Cosmetics Raw Material Skin Whitening CAS 501-30-4 Kojic Acid

Product Details

Product Name:Kojic Acid
CAS No.:501-30-4
Molecular formula:C₆H₆O₄
Molecular weight:142.11
EINECS No.:207-922-4

Synonyms:4H-Pyran-4-one,5-hydroxy-2-(hydroxymethyl)-; 5-hydroxy-2-(hydroxymethyl)-4h-pyran-4-on; Pyran-4-one, 5-hydroxy-2-(hydroxymethyl)

Kojic acid is a naturally occurring compound that is often used in cosmetic and skincare products for its skin-brightening properties. It is produced by certain types of fungi and is commonly found in foods such as soy sauce, miso, and sake.

Kojic acid works by inhibiting the production of tyrosine, an amino acid that is involved in the production of melanin, the pigment that gives skin its color. This can help reduce the appearance of hyperpigmentation, dark spots, and other discolorations on the skin.

In addition to its skin-brightening properties, kojic acid also has antioxidant properties, which can help protect the skin against damage from free radicals and other environmental stressors.

Kojic acid is often used in skincare products as a skin-lightening agent that has been associated with potential health risks. It is also a popular ingredient in products designed to improve the appearance of acne scars and other forms of skin discoloration.

Overall, kojic acid is a versatile and effective ingredient that can provide multiple benefits for the skin, making it a popular choice in a wide range of cosmetic and skincare products.

Skin Whitening CAS 501-30-4 Kojic Acid

Kojic acid has several functions and applications in cosmetic and skincare products. Here are some of its key functions:

Skin-brightening: Kojic acid inhibits the production of tyrosine, an amino acid that is involved in the production of melanin, the pigment that gives skin its color. This makes it a popular ingredient in products designed to brighten and even out skin tone.

Anti-aging: Kojic acid has antioxidant properties that can help protect the skin against damage from free radicals and other environmental stressors, making it a valuable ingredient in anti-aging products.

Acne-fighting: Kojic acid has antibacterial properties that can help reduce inflammation and acne breakouts, making it a popular ingredient in products designed for acne-prone skin.

Scar-reducing: Kojic acid is often used in products designed to improve the appearance of acne scars and other forms of skin discoloration.

Some common applications of kojic acid in skincare products include:

Brightening serums and creams: Kojic acid is often included in products designed to brighten and even out skin tone.

Anti-aging creams and serums: Kojic acid's antioxidant properties make it a valuable ingredient in anti-aging products.

Acne treatments: Kojic acid is often included in products designed to treat acne and reduce inflammation and breakouts.

Scar treatments: Kojic acid is often used in products designed to improve the appearance of acne scars and other forms of skin discoloration.

Overall, kojic acid is a versatile and effective ingredient that can provide multiple benefits for the skin, making it a popular choice in a wide range of cosmetic and skincare products.

Appearance	Almost White Crystal or powder
Purity(%)	≥99.0
Chloride (mg/Kg)	<100
Heavy metals(%)	0.0001
Arseni(%)	0.0001
