

Skin Whitening Glutathione /L-Glutathione Reduced CAS 70-18-8 L-Glutathione Reduced

Our Product Introduction

for more products please visit us on intermediateschemicals.com

Basic Information

- Place of Origin: China
- Brand Name: KHD
- Model Number: 70-18-8
- Minimum Order Quantity: 1kg
- Price: Please consult customer service
- Packaging Details: 1kg/bag, 25kg/drum
- Delivery Time: 2-5 days
- Payment Terms: T/T, Western Union, Bitcoin
- Supply Ability: 10000kg/Day

Product Specification

- Appearance: Powder
- Color: White
- Brand Name: Kaihuida
- Purity: $\geq 99\%$
- Specifications: 1kg/bag, 25kg/Drum
- Highlight: bromoethyl benzene Intermediates, bromoethyl benzene 103-63-9, CAS 103-63-9

Product Description**Skin Whitening Glutathione /L-Glutathione Reduced CAS 70-18-8 L-Glutathione Reduced****Product Details**

Product Name	Glutathione
Category	Plant Extracts
Analysis	HPLC
Storage	Keep in cool and dry place, well-closed, away from moisture or direct sunlight.

1. Glutathione (GSH) is a tripeptide that contains an unusual peptide linkage between the amine group of cysteine (which is attached by a normal peptide linkage to a glycine) and the carboxyl group of the glutamate side-chain. It is an antioxidant, preventing damage to important cellular components caused by reactive oxygen species such as free radicals and peroxides.

2. Thiol groups are reducing agents, existing at a concentration of approximately 5 mM in animal cells. Glutathione reduces disulfide bonds formed within cytoplasmic proteins to cysteines by serving as an electron donor. In the process, glutathione is converted to its oxidized form glutathione disulfide (GSSG), also called L(-)-Glutathione.

3. Glutathione is found almost exclusively in its reduced form, since the enzyme that reverts it from its oxidized form, glutathione reductase, is constitutively active and inducible upon oxidative stress. In fact, the ratio of reduced glutathione to oxidized glutathione within cells is often used as a measure of cellular toxicity.
