## Product Description

### 60%,70%,75% Feed Additive Choline Chloride CAS 67-48-1 For Aquaculture

## Product Details

Choline Chloride has essential functions in the body of human being and animals. It is generally classified as a Vitamin of B complex.

Choline occurs in the form of choline chloride, It is used by most animals as a precursor of acetyl choline, which influences the transmission

of impulses from nerves to muscles. It is also used as a source of methyl groups. In feed, the content of natural choline chloride limited. It

can not satisfy complete demand for the animal growing. Therefore, choline is widely used as feed additive at home and abroad. It will

stimulate the animal or poultry's growth, put on their weight rapidly and boost up the body's immunity function. It has prominence effects

on improving the quality and quantity of eggs and meat.

#### Application:

1) Use for the treatment of fatty liver and cirrhosis, but also for feed additives, can stimulate ovarian egg production, litter and livestock,

fish and other weight gain.

2) The use of choline chloride can effectively prevent and treat fat deposition and tissue degeneration in livestock and poultry organs.

3) Use is an efficient nutritional supplements and fortifiers.
