Application field

As a synthetic sweetener, sodium saccharin is 200-500 times sweeter than sucrose. It is often used in food and daily chemicals, and its main function is to enhance the sweet taste.

Sodium saccharin is used in cosmetics as an odor inhibitor, oral care, and fragrance. The application in skin care cosmetics is mainly in lip gloss, lipstick, hand cream, face cream and other products. Sodium saccharin has a risk factor of 1, which is relatively safe and can be used with confidence. It generally has no effect on pregnant women, and sodium saccharin does not cause acne.
