

Pharmaceutical Intermediates Povidone Iodine / Pvp-Iodine CAS 25655-41-

8

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: KHD
- Model Number: 25655-41-8
- Minimum Order Quantity: 1kg
- Price: Please consult customer service
- Packaging Details: 1kg/bag, 25kg/drum
- Delivery Time: 2-5 days
- Payment Terms: T/T, Western Union, Bitcoin
- Supply Ability: 10000kg/Day

Product Specification

- Appearance: Powder
- CAS: 25655-41-8
- Color: Red
- Brand Name: Kaihuida
- Purity: ≥99%
- Specifications: 1kg/bag, 25kg/Drum
- Highlight: **Pharmaceutical Grade Povidone Iodine,
Pvp-Iodine Powder,
CAS 25655-41-8 Povidone Iodine**

Product Description**Pharmaceutical Intermediates Povidone Iodine/Pvp-iodine CAS 25655-41-8****Product Details****What is Povidone Iodine?**

Povidone iodine is a loose complex of elemental iodine combined with polymer support, and povidone acts as a carrier and solubilizer. It is yellow brown to brown red amorphous powder at room temperature. Slightly odorous, soluble in water or ethanol, acidic in aqueous solution, insoluble in chloroform, ethane and carbon tetrachloride. Povidone iodine aqueous solution without iodine tincture disadvantages, light color, easy elution, small stimulation to the mucosa, no ethanol deiodination, no corrosion, and low toxicity.

Povidone iodine is a broad-spectrum and powerful disinfectant, which has a strong killing effect on viruses, bacteria, fungi and mold spores. This product has little irritation to skin, low toxicity and long lasting effect. It is safe and easy to use. It is basically non-irritating to tissues and is used for skin and mucosal disinfection, such as cleaning before surgery, disinfection of surgical sites and wounds.

Povidone iodine, usually in a 10% solution, is used as a disinfectant. Effective kill: Newcastle disease, Bursal, avian influenza, Mycoplasma, Escherichia coli, Salmonella, influenza, blue ear disease, etc. It can also kill the eggs of livestock and poultry parasites and inhibit the breeding of insects such as mosquitoes and flies. And can be used in fruit trees, crops, fish and shrimp breeding.

Broad bactericidal spectrum, strong bactericidal power, can directly kill bacteria, fungi, viruses, spores and protozoa. The sterilization speed is fast, most bacteria can be killed within 30 seconds, and 5 minutes is enough to kill individual bacteria. It can be used for disinfection and treatment of body cavity, mucosa and ulcer surface without irritation to skin and mucosa. No toxicity was observed. It is not easy to cause microbial resistance and allergic reactions. Long lasting use, good stability, long storage validity. Easy to dissolve in water, easy to clean, do not pollute or damage fabrics and other items.

Application of Povidone Iodine:

1. For suppurative dermatitis, skin fungal infection, small area of mild burns, but also for small area of skin, mucosal wound disinfection.
2. Bacterial, fungal vaginitis, cervical erosion, trichomonas vaginitis, pudendal itching, pudendal infection odor, yellow odor of leucorrhea, comprehensive pudendal inflammation, senile vaginitis, herpes, gonorrhea, syphilis and prevention and local treatment of condyloma acuminatum.
3. Balanitis, preputial dermatitis, external genitalia and surrounding disinfection. Prevention and topical treatment of gonorrhea, syphilis, and condyloma acuminatum.
4. Disinfection of tableware and tableware.
5. Skin disinfection of the surgical site.

Product Name:	Povidone Iodine
Chemical Name:	Betadine
CAS No.:	25655-41-8
Molecular Formula:	C ₆ H ₉ I ₂ NO
Appearance:	Yellowish-brown or reddish-brown amorphous powder
Storage:	Store in a cool, dry place.
Shelf Life:	3 Years
Package:	1kg/10kg/25kg

Company Profile

Jiangsu Kaihuida New Material Technology CO., Ltd was founded in 2010. More than ten years of export experience. Specializing in the production of pharmaceutical raw materials, odybuilding products, local anesthesia products, best-selling pharmaceutical intermediates, etc. The quality of our products has reached the international leading level. Can provide free samples to provide testing. Provide product customization services.

Our main products: Pharmaceutical intermediates, Food additive, Flavor, Organic intermediate, Cosmetic materials, Chemical Raw materials, Daily chemicals, Dye intermediate, Disinfectant, and other products.

Our main sales market: the United States, Canada, Mexico, Australia, the United Kingdom, France, Germany, Italy, South Korea, the Netherlands, Sweden, Spain, Switzerland, Colombia and other countries and regions.

FAQ

Q1. Can I have a sample order for your products?

A: Yes, we welcome sample order to test and check quality. Mixed samples are acceptable.

Q2. What about the lead time?

A: Sample needs 3-5 days, mass production time needs 1-2 weeks for order quantity more than

Q3. Do you have any MOQ limit for order?

A: Low MOQ, 10-100g for sample checking is available

Q4. How do you ship the goods and how long does it take to arrive?

A: We usually ship by DHL, UPS, FedEx or TNT. It usually takes 3-5 days to arrive. Airline and sea shipping also optional.

Q5. How to proceed an order for your products?

A: Firstly let us know your requirements or application.

Secondly We quote according to your requirements or our suggestions.

Thirdly customer confirms the samples and places deposit for normal order.

Fourthly We arrange the production.

Q6. Is it OK to print my logo on package?

A: Yes. Please inform us before our production and confirm the design firstly based on our sample.

Q7: Are you trading company or manufacturer?

A: We are chemical factory in China. So we can provide wholesale price.
