### Description

Humanin is an endogenous mitochondria-derived peptide that has cytoprotective effects and reduces oxidative stress. Experiments using cultured cells have demonstrated that humanin has both neuroprotective as well as cytoprotective effects and experiments in rodents have found that it has protective effects in Alzheimer's disease models, Huntington's disease models and stroke models.

### Application&Function

Humanin is proposed to have myriad neuroprotective and cytoprotective effects.

Both studies in cells and rodents have both found that administration of humanin or humanin derivatives increases survival and/or physiological parameters in Alzheimer's disease models.
