#### Description

SYN-AKE is an anti-wrinkle active compound based on a synthetic tripeptide that mimics the effect of Waglerin 1, found in the venom of the Temple Viper. The biological activity of SYN-AKE reduces the contraction frequency of muscle cells on the face, thereby decreasing expression lines.

It prevents the fixation of acetylcholine-the contraction messenger' for facial muscles that calms the muscle contractions that would increase wrinkling. The frequency of muscle contraction is reduced only after 2 minutes treatment. In vivo testing showed an impressive reduction of over 50% in wrinkle size after 28 days.

#### Application&Function

1. Dipeptide Diaminobutyroyl Benzylamide Diacetate helps reduce wrinkles and laughter lines
2. Age-defying products particularly effective against expression lines
3. Intensive wrinkle-smoothing products.
