**Description**

Acetyl Tetrapeptide-2 is a biomimetic peptide derived from the youth hormone, thymopoietin. It compensates the natural loss of thymic factors related to the decline of the thymus with age. It increases the skin immuno-vigilance and helps it regenerates.

Acetyl Tetrapeptide-2 is an ideal ingredient to improve skin firmness by enhancing the natural elements that manage to maintain these properties in the skin, including elastin and collagen. Thus, it can be incorporated in firming and anti-aging formulations for both facial and body care, where skin cohesion and resilience wants to be increased to minimize sagginess and flaccidity. More over, it would be also useful to add in slimming formulations to avoid flaccidity after losing weight.
