

Biotinoyl Tripeptide-1 Powder 99% Pure Biotinyl Ghk Tripeptide Solution For Anti-Hair Loss CAS 299157-54-3

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: KHD
- Model Number: 299157-54-3
- Minimum Order Quantity: 1g
- Price: Please consult customer service
- Packaging Details: 1kg/bag, 25kg/drum
- Delivery Time: 2-5 days
- Payment Terms: T/T, Western Union, Bitcoin
- Supply Ability: 10000kg/Day

Product Specification

- Color: White Powder
- Brand Name: Kaihuida
- Form: Powder
- Highlight: **Anti-Hair Loss Biotinoyl Tripeptide-1 Powder , CAS 299157-54-3 Biotinoyl Tripeptide-1 Powder , 99% Pure Biotinoyl Tripeptide-1 Powder**

Product Description

Biotinoyl Tripeptide-1 Powder 99% Pure Biotinoyl Ghk Tripeptide Solution for Anti-Hair Loss CAS 299157-54-3

Product Details

Product name	Biotinoyl Tripeptide-1
Appearance	White powder
Purity	99%
Storage	Keep in a cool, dry, dark location in a tightly sealed container or cylinder.
Shelf Life	24 Months

Description

Biotinoyl Tripeptide-1 is a haircare ingredient that fights follicle aging and follicle atrophy caused by dihydrotestosterone. By stimulating scalp micro-circulation and the production of anchoring molecules, Biotinoyl Tripeptide-1 positively effects the hair follicle which strengthens hair, inhibits hair loss and promotes growth.

Biotinoyl Tripeptide-1 has three peptides providing different benefits for hair and skin. The third peptide stimulates melanin production and transfer from melanocytes to keratinocytes, to restore color to the hair. For this reason, Biotinoyl Tripeptide-1 is mainly used in hair care products; shampoos, conditioners, hair lotions. Biotinoyl Tripeptide-1 is beneficial for eyelash and eyebrow hair growth as well.

Application&Function

Biotinoyl Tripeptide-1 is also used as a skincare ingredient to reconstruct and repair skin by activating tissue repair gene expression and promoting cell proliferation and differentiation.

Tripeptide-1 (GHK peptide) derivatives

Biotinoyl Tripeptide-1 fights against premature hair loss. Hair follicles maintain their youth through the stimulation of cell communication and metabolism. Thanks to stimulating peptide that promotes anti-aging processes in the follicle, encouraging anchoring of molecules, supporting hair growth, and slowing down premature hair loss.

This vitaminized (Vitamin B7) tripeptide complex targets the leading causes of alopecia-a physical phenomenon that, in a lifetime, can affect the hair growth cycle in as many as 70% of Caucasian men and up to 50% of Caucasian women.

Biotinoyl Tripeptide-1 helps slow the aging effects by lessening harmful dihydrotestosterone (DHT) production, improving irrigation of the hair follicle, stimulating the production of anchoring molecules, and promoting hair growth much as 121%.
